SUMMARY

Full-stack web developer with practical experience in the **MERN and MENN stacks (MongoDB/MySQL, Express.js, React/Next.js, Node.js)**. Skilled in building **responsive web applications**, integrating **REST APIs**, and managing **databases**. Currently working in a **product support** role, where I **collaborate with development teams** to resolve technical issues and **automate internal workflows**—resulting in over **80% improvement in efficiency**. Now looking to transition into a **full-time development role** to apply and expand my skills in building **real-world applications**.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science

June 2023

Visvesvaraya Technological University (VTU)

CGPA: 7.49 / 10

TECH STACK AND TOOLS

Languages & Markup: JavaScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, Mongoose (ODM)

APIs & Integrations: REST APIs, JWT (JSON Web Tokens), OAuth 2.0, OpenAI API (GPT), Lovable AI

Tools & Platforms: Git, GitHub, GitHub Copilot, Visual Studio Code (VS Code), Postman, Vercel

PROJECTS

Full Stack Social Media Project | MERN stack

A full-featured social media platform enabling users to post, like, and follow others, built with the MERN stack.

- Developed **RESTful CRUD APIs** with **Node.js**, **Express.js**, and **MongoDB**, including **JWT-based authentication** and protected routes
- Built **follow/unfollow** and **timeline features** using **Mongoose aggregation** for dynamic content delivery
- Designed a **secure backend** architecture to manage sessions and user data efficiently

Personal Developer Portfolio | Next.js, Tailwind CSS

A responsive and modern portfolio website to showcase projects and skills.

- Built with Next.js enabling server-side rendering and optimized routing
- Integrated **Framer Motion** for smooth, interactive UI animations
- Designed a **mobile-first**, responsive layout using **Tailwind CSS** for visual consistency

Todo App | React, Redux Toolkit, Tailwind CSS

A scalable task management application with persistent local storage for efficient productivity tracking.

- Developed with **React** and **Redux Toolkit** for efficient task and state management
- Implemented **localStorage persistence** to maintain tasks across sessions
- Created a responsive interface using **Tailwind CSS**, ensuring cross-device usability

Other Projects:

- **Netflix Clone** – React, TMDB API: Built dynamic routes and trending media pages using external APIs
- **Movie Explorer** – React, Context API: React, Context API: Implemented search, global state, and favorites system

EXPERIENCE

Executive - Customer Success | Kidvento Education & Research Pvt Ltd

Aug 24 - Current

- Built a **WhatsApp bot knowledge base**, cutting **query resolution time** by 40% and improving **customer support responsiveness**.
- Collaborate with **product and engineering teams** to identify and resolve **Ulipsu platform issues**, ensuring smoother **user experience**.
- **Automated the bug documentation process** using **Zapier**, reducing time from **30 minutes to 5 minutes/day**, achieving an **83% improvement in process efficiency**
- Translate **technical issues** into actionable insights for non-technical stakeholders, bridging gaps between teams
