SUMMARY

Full-stack web developer with a good foundation in the **MERN** and **MENN** stacks, including **JavaScript**, **React**, **Next.js**, **Node.js**, **Express**, **MongoDB**, and **MySQL**. **Proficient** in building **responsive web apps**, working with **REST APIs**, and managing **databases**. My background in **product support** involved **SQL-based bug fixes**, **debugging**, and **collaborating** with **dev teams** to resolve issues—experience that sharpened my **problem-solving** and **cross-functional communication** skills. Now looking to **apply and grow** these skills in a dynamic **full-stack developer** role.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science

June 2023

Visvesvaraya Technological University (VTU)

CGPA: 7.49 / 10

TECH STACK AND TOOLS

Languages & Markup: JavaScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, Mongoose(ODM)

APIs & Integrations: REST APIs, JWT (JSON Web Token), OAuth, OpenAI (GPT), Lovable AI

Tools & Platforms: Git, GitHub, GitHub Copilot, VS Code, Postman, Vercel

PROJECTS

Full Stack Social Media Project | MERN stack

A full-featured social media platform enabling users to post, like, and follow others, built with the MERN stack.

- Built RESTful CRUD APIs using Node.js and Express, integrated with MongoDB
- Implemented user authentication, follow/unfollow, and timeline feed using Mongoose aggregation
- Implemented user authentication and protected routes using JWT (JSON Web Tokens) in the backend API for secure session management

Personal Portfolio Website | Next.js, Tailwind CSS

Responsive and modern developer portfolio to showcase projects and skills.

- Built with Next.js enabling server-side rendering and optimized routing
- Used Framer Motion for smooth animations and interactive transitions
- Designed a mobile-first layout with Tailwind CSS for consistent styling

Todo App | React, Redux Toolkit, Tailwind CSS

A scalable task management application with persistent local storage for efficient productivity tracking.

- Built with React and Redux Toolkit to manage tasks and application state efficiently
- Implemented local storage persistence to retain tasks across browser sessions
- Designed a responsive, user-friendly interface using Tailwind CSS for consistent styling

Other Projects:

- **Netflix Clone** – React, TMDB API: Dynamic routing, trending media browsing
- **Movie Explorer** – React, Context API: Search, global state, and favorites system

EXPERIENCE

Executive - Customer Success | Kidvento Education & Research Pvt Ltd

Aug 24 - Current

- Developed a **knowledge base** for **WhatsApp bot automation**, enhancing **customer support efficiency** and reducing **query resolution time** by **40%**
- Collaborated with **product** and **engineering teams** to identify and resolve **technical issues** related to the **Ulipsu platform**, improving **user experience**.
- **Automated** the **bug documentation process** using **Zapier**, reducing time from **30 minutes** to **5 minutes/day**, achieving an **83% improvement in process efficiency**
- Regularly **communicate technical concepts** to **non-technical stakeholders**, facilitating a **bridge between product and technical teams**
